

**Lamprell Delivers “Seajacks Leviathan” the Second Self Elevating, Self Propelled Liftboat to Seajacks UK Ltd**

The naming and delivery took place at a lavish ceremony at Lamprell's new Hamriyah Freezone Facility, in the UAE yesterday, attended by representatives from Seajacks UK Ltd and Lamprell Project and Corporate Management, as well as representatives from local press and media and a host of industry professionals and senior management from the Hamriyah Freezone Authority.

Lamprell officially named and handed over the second Gusto MSC designed Liftboat “Seajacks Leviathan” to Thomas Berg, CEO of Seajacks and the official naming was performed by Mrs. Gry Berg.

The vessel is a self propelled, self elevating liftboat, intended for use in harsh environment conditions.

Both of the Seajacks vessels were detailed designed and constructed by Lamprell's to meet the strenuous Northern European Offshore Construction Codes and practices.

The Project was full of immense challenges of Detail Design Engineering, Procurement, Construction and Outfitting, all of which was a significant achievement, and the resulting vessel was delivered on schedule and within budget.

The vessel is equipped with the latest in Class 2 Dynamic Positioning technology, luxurious accommodation for 90 persons with extremely high standards throughout.

The project build duration was 18 months and the value was US \$ 112 million.

Seajacks Leviathan will now depart in early July to undertake a project installing wind turbines in the North Sea for Flour.
