### **LAMPRELL AWARDS ROBOTICS PROJECT**

#### **Ventherm A/S to deliver advanced blasting and painting robots for Lamprell's serial production line**

Lamprell has awarded Ventherm A/S a contract to deliver a fully automated robotic solution for the surface treatment of transition pieces used in offshore wind foundations.

This first-of-its-kind project introduces a fully automated system designed to handle complex geometries and meet demanding performance standards. The solution features a blasting robot for surface preparation and a paint robot operating within a 140-metre-long booth, engineered specifically for transition pieces. It also includes a turnkey paint equipment package for heavy-duty coating systems, along with automatic programming capabilities that enable the robots to adapt to varying specifications with minimal manual input.

By incorporating this advanced solution into its serial production line, Lamprell is enhancing quality, improving productivity and reducing waste; thereby delivering a more sustainable and efficient fabrication process.

**Lamprell Project Director - Renewables, Sachith Jagannath, commented:** "The integration of robotics into our production line marks a significant step forward in our drive for greater efficiency, quality, and sustainability. It reflects our commitment to continuous improvement and embracing smart technologies to better serve our clients and the energy industry at large. Ventherm has a strong track record and specialised expertise in robotic surface treatment, and we look forward to working alongside them as they execute this project."

The robotic system is scheduled to be fully operational by 2026 at Lamprell's facility in Hamriyah, United Arab Emirates.

Ends//

#### **About Lamprell:**

Lamprell is a leading provider of services to the international energy sector. Driving strategy and growth through its offshore wind and oil & gas business units, underpinned by almost half a century of expertise, the Group has worked hard to establish its reputation for delivering projects safely, on time and to budget. Lamprell has firmly established its international credentials in the offshore wind sector and continues to build on its traditional oil & gas credentials. We are recognised for building complex offshore and onshore process modules, jackets, and platforms and fabricating and refurbishing jack-up rigs and liftboats. Lamprell employs more than 6,000 people across multiple facilities, with its primary facilities located in Hamriyah, in the UAE. Combined, the Group's facilities

cover approximately 750,000 m<sup>2</sup> with over 1.2 km of quayside. In addition, the Group has facilities in Saudi Arabia (through a joint venture agreement).
